Vorarlberg University of Applied Sciences (FH Vorarlberg)

Key facts

Founded 1994

1.300 students / 250 staff members

Excellent student-staff-ratio

State-of-the-art infrastructure

19 degree programmes

5 Research Centres

Small class sizes

Efficient and practice-oriented instruction

Immediate connection between research
and studies

International focus

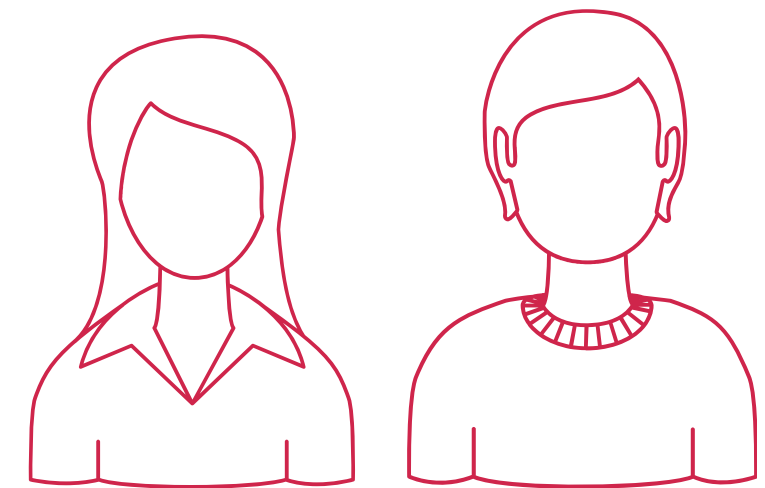

Core competences

Engineering and Technology

Business

Design

Social Work

Degree Programmes

Bachelor Degrees – 3 years

- ♦ International Business (full-time + part-time)
- ♦ Mechatronics (full-time + part-time) / Mechanical Engineering / Electrical Engineering
- ♦ Computer Science – Software and Information Engineering
- ♦ Engineering and Management
- ♦ InterMedia
- ♦ Social Work (full-time + part-time)

Master Degrees – 2 years

- ♦ Business Process Management / Accounting, Controlling & Finance / International Marketing & Sales
- ♦ Computer Science
- ♦ InterMedia
- ♦ Mechatronics
- ♦ Social Work
- ♦ Energy Technology and Energy Economics

Further Education

- ♦ Via Schloß Hofen

Research and Development

As a University of Applied Sciences we are very much focused on working together with business and industry.

In the joint ventures with business and industry FH Vorarlberg is guided by the principle of serving the region through internationally recognised research and has channelled the resources into 5 strategic areas:

- ♦ Microtechnology
- ♦ User Centred Technologies
- ♦ Process- and Product-Engineering
- ♦ Social and Economic Sciences
- ♦ Energy

International Activities

Internationalisation has a high priority

- ♦ Cooperation agreements with 110 higher education institutions
- ♦ In 23 countries in Europe
- ♦ In Australia, Brazil, Chile, China, Costa Rica, India, Mexico, Peru, Puerto Rico, South Korea, Taiwan, Turkey, USA.

Strong focus on mobility activities

- ♦ More than 50 % of the fulltime bachelor students study for at least one semester abroad
- ♦ 120 international exchange students per year
- ♦ Short Term Programmes in BRIC Countries

Fields of cooperation

- ◆ Training for academic staff and joint development of lectures or Teamteaching; one lecture per semester at FH Vorarlberg and one lecture at the Iranian partner university.
- ◆ Study trips to Iran and Vorarlberg including company visits (Master Degree Programms).
- ◆ Cooperation in research projects in the areas Microtechnology, User-Centred Technologies, Process and Product Engineering, Social sciences and economics and especially Energy (Demand Side Management, Materials, ...).
