EDUCATIONAL COOPERATION

with Eastern and South-Eastern Europe in the pre-university sector

+ Promotion of cooperation between educational institutions in Austria and in Eastern and South-Eastern Europe to sustainably support educational reforms in the pre-university sector.

+ Learning from each other between education systems at the interface between developments in education at national level and at EU level.

Focus: Quality development in vocational education and training
Example: Project “EFFECTIVE QUALITY DEVELOPMENT IN VET THROUGH SUCCESSFUL CHANGE MANAGEMENT – Strengthening the leadership competences of school leaders”
Quality development in VET is a development priority in Serbia, Bosnia and Herzegovina and Montenegro. The aim of this regional project is to strengthen the leadership and change management competences of school directors for effective quality development through tailor-made professional development programs. In Serbia over 150 VET school directors will be trained.

Focus: Cooperation between schools and business
Example: Project “ASSURING THE QUALITY OF IN-COMPANY LEARNING IN SCHOOL-BASED VOCATIONAL EDUCATION AND TRAINING”
The project supports the Serbian Ministry of Education in developing the quality of in-company training in school-based VET. Based on an analysis of the different formats of WBL in school-based VET the project has supported the development of an internship regulation as a legal framework for improving the quality of internships. The implementation of this regulation will be supported by round tables and trainings for over 150 VET schools.
Higher education cooperation and mobility

Transnational cooperation supports institutional capacity development. Stays abroad contribute to personal competence building and strengthen the innovative capacity of institutions and entire education systems.
