educational cooperation

**Programme with Eastern and South-Eastern
Europe in the pre-university sector**

- + Promotion of cooperation between educational institutions in Austria and in Eastern and South-Eastern Europe to sustainably support educational reforms in the pre-university sector.
- + Learning from each other between education systems at the interface between developments in education at national level and at EU level.

FOCUS: VOCATIONAL EDUCATION AND TRAINING (VET)

Good practice project on bilateral level: **AL-VET – QUALITY FOR ALL**

Tourism, as a significant and rapidly growing economic factor in Albania, requires highly trained skilled workers. Therefore, the project (2021–2024) aimed to improve the labour market relevance, quality and social inclusiveness of initial VET in the sectors tourism, hotel and catering, and IT. It was mainly funded by the City of Vienna.

Project example: **Dual VET for Albania**

Combining classroom instruction at a vocational school with practical training in a company (dual VET) provides well-qualified professionals and is a top priority for the Albanian Government and the EU.

The project (2025–2027) focuses on supporting the introduction of dual VET through a wide range of awareness raising activities to share the challenges, responsibilities and benefits of this VET path.

Good practice project on regional level: **Quality Assurance for the Work of the Business Liaison Coordinators**

Connecting VET providers with companies increases the employability of young people. The project (2022–2025) aimed to further strengthen VET schools as competent partners of the private sector by introducing Business Liaison Coordinators in the school system and assuring the quality of their work.

Project example: **Get Ready 4 Job Through Career Guidance**

Career guidance (CG) and counselling play a crucial role for students to make well-informed decisions for their future and to support their transition to the labour market. The project (2025–2027) fosters a sustainable and high-quality system of CG within VET schools, including the promotion of VET in cooperation with primary schools.

THE OeAD

Austria's Agency for Education and Internationalisation

The OeAD advises, supports and connects people and institutions in education, science, research and culture with its future-oriented programmes.

As an agency of the Republic of Austria, the OeAD thus contributes to inclusive, equal and high-quality education.

European and international exchange as well as transnational mobility serve as the agency's most important tools.

Internationalisation and the support for transnational cooperation and mobility associated with it are valuable aspects in education, science and research. High-quality education, science and research need an international orientation.
